FIFTY YEARS OF ROSE-GROWING

A record such as this of Antoine Wintzer, Vice-President of The Conard & Jones Company, is noteworthy, we believe, because unmatched in America today.

Mark Sullivan, now editor of *Collier's* weekly, a national periodical of 600,000 circulation, was once a West Grove schoolboy. On Independence Day, 1916, in an address at West Grove before the people of his home county, he said:

"I would like to acknowledge again the pleasure I have in coming here and seeing an occasional face that I remember. A man who used to speak to me when I went past his place was Mr. Antoine Wintzer. He, I am sure, did not know just who the little boy was, but out of the kindness of his heart he used to speak to me, and that gave me a feeling of exaltation and helped me. I often think some especial honor ought to be paid to him. You are no doubt familiar with the proverb that the man who excels in his art shall stand before kings—not just those words, but containing that thought. Mr. Wintzer excels in his art. He brought to West Grove the business of raising flowers, and it has become the chief industry of the town. A man of that kind always commands admiration and respect and, in the words of the proverb, shall stand before kings."

Antoine Wintzer

The fiftieth milestone was passed last summer. Fifty years ago in July Antoine Wintzer, our Vice-President, came to West Grove and began growing Roses for the people of America, and throughout every year for half a century he has made or directed the making of thousands upon thousands of Roses that have gone out from West Grove.

SATISFACTION is the big word upon which we are building this business to yet larger proportions.

"Both the goods and our service every day and to every patron *must* give satisfaction," we feel; lacking this, we solicit prompt notification.

We strive to make ordering easy. For our patrons we publish

"*New Floral Guide*," 92 pages, January 1 (this book).

"*Autumn Floral Guide*," 32 pages, September 1.

"*How to Grow Roses*," 121 pages, a handbook (see page 6).

"*Beautify Your Yard*," an instructive manual; price, 10 cts.

(Other books are suggested on pages 5 and 90)

A privilege we value is membership with the leading helpful national floral organizations, such, for example, as

The American Rose Society
The American Dahlia Society
The American Peony Society
The American Sweet Pea Society

To our patrons, who request it of us, we hereby offer an introduction to the same opportunities.

"That there is in this country a universal awakening in the interest of outdoor gardening and to the recognition of the fact that a garden transforms a dwelling into a home, is proved to the hilt. The art of gardening and the love for hardy flowers has come to stay."

We have a choice selection with which to help **YOU**.

"How to Grow

Roses"

A Book of 121 pages—
16 in natural colors—that
will lead you to realize

The Joy of Accomplishment

Have you arrived at that stage in your Rose-growing? Do your Roses thrive for you and *produce*? If you do not already know "how" to select, plant, prune, cultivate, fertilize, spray, etc., and want clear, concise instructions that will guide you to success, get this book. In it you will find the accumulated wisdom of a half-century's experience—information that is of untold value to anyone interested in the growing of Roses for pleasure or profit. Eminent amateurs have commended it; even professionals prize it for their personal use.

"It contains in so few pages so much practical information, and somehow I felt as if the people who compiled it really cared for roses."

It was Frances Hodgson Burnett, the author of "Little Lord Fauntleroy" and "The Secret Garden," who made the above comment on a former edition of this book, now enlarged, improved and revised.

FROM A FAMOUS HORTICULTURIST.—I have read "How to Grow Roses" twice, and consider it the most valuable work on Roses for America ever sent out. Its construction is admirable, and shows thought and wisdom. The calendar gives valuable instructions in a nutshell, and your cuts on drainage, pruning, etc., are just right. The whole work is admirable, and you should be proud of it. Sincerely yours,
W. C. EGAN,
"Egandale," Highland Park, Ill.

DEPARTMENT OF FLORICULTURE, MASSACHUSETTS AGRICULTURAL COLLEGE.—I was amazed at the way you put all the information on this wonderful flower into such a small volume. It is certainly a creditable piece of work, and by far the most practical treatise on the subject that has come to my notice.
PROF. ARNO H. NEHRLING.

THE PRESIDENT OF THE AMERICAN ROSE SOCIETY says: I know wherever it goes it will be appreciated and of valuable assistance for further reference. Very truly yours,
S. S. PENNOCK.

"SOME RECOMMENDATION"

May 4, 1916.
Gentlemen:—The stock of Roses just received by me, on my order, seem to be the best which I have ever received from you, which is quite some recommendation, as there has never been any complaint from me; but this year the stock seems to be exceptionally fine and I desire to thank you for your very prompt attention.—M. B. M., Mount Joy, Pa.

"ONE GRAND BLOOMING SUCCESS"

Gentlemen:—I have the pleasure of informing you that the Roses purchased from you last March were one grand blooming success, all summer nearly, and after once commencing they continued until Jack Frost had been on several visits too, because I covered them during the nights. To see the Roses was a delight. When any one wishes to attempt to grow Roses, I can now advise where to obtain Roses that grow and bloom.—Carl W. A. A., Wilton, N. D. No. 11686

NEWEST ROSES, 1917

Our 1917 list of Newest Roses contains the choicest of the prize-winning varieties that we predict will rank high among the leaders in their class and color for years to come

With eyes kept fixed on the Novelty output of the leading Rose-growers in every part of the world, we pursue earnestly our endeavor to procure for the benefit of our customers everything of promise. Most of these demand further trial before being offered at all, but an intimate knowledge of the extensive birthplace tests made of the Roses while yet unnamed, and the results of the European and American Exhibitions, enable us to offer, out of the total introductions of the past twelve months, 8 that have already distinguished themselves as superior varieties.

Please realize that the original supply of these highly honored Novelties is yet so limited in proportion to the demand as to make the following prices reasonable.

NOTE.—The following famous Novelties are still so new in commerce that we must offer them here, in most cases, subject to safe arrival from abroad. With the exception of Hugonis, they are to be strong, field-grown plants, not on their own roots, as are most of the C. & J. Roses, but budded or grafted. Care, therefore, must be taken to plant so as to cover the joint, and in case a shoot of the wild Rose appears later from the root, it is easily cut out, as it may be readily distinguished by seven small, narrow leaves instead of five large leaves.

Introducers' Descriptions Abbreviated

LOS ANGELES. H.T. Truly a magnificent Rose in vigor of growth, color, form, fragrance, and, in fact, in everything required of a first-class Rose. The color is a luminous flame-pink, tinged with coral and shaded with translucent gold at the base of the petals. The buds are long and pointed and they expand into an intensely fragrant, beautiful flower of large size. \$2 00

CLARICE GOODACRE. H.T. A Rose of exquisite form and unique color, coupled with a most distinct and refreshing *tangerine-orange* perfume. Its pointed blooms are zoned biscuit-chrome on ivory-white, stiff petals which always come perfect. 3 00

DONALD MACDONALD. H.T. Blooms are full with shell-like petals which glow with exquisite intensely orange-carmine color and the buds develop naturally into miniature exhibition blooms, $3\frac{1}{2}$ to 4 inches across, inexpressibly charming. 3 00

HUGONIS. (Species.) The illustration on the opposite page will show the exceptionally floriferous character of this remarkable new Rose which is the first Rose to bloom in the spring, coming into bloom from ten days to two weeks ahead of the early Harison's Yellow. The color is intense canary-yellow, very bright and attractive, and the plant is noteworthy all the growing season

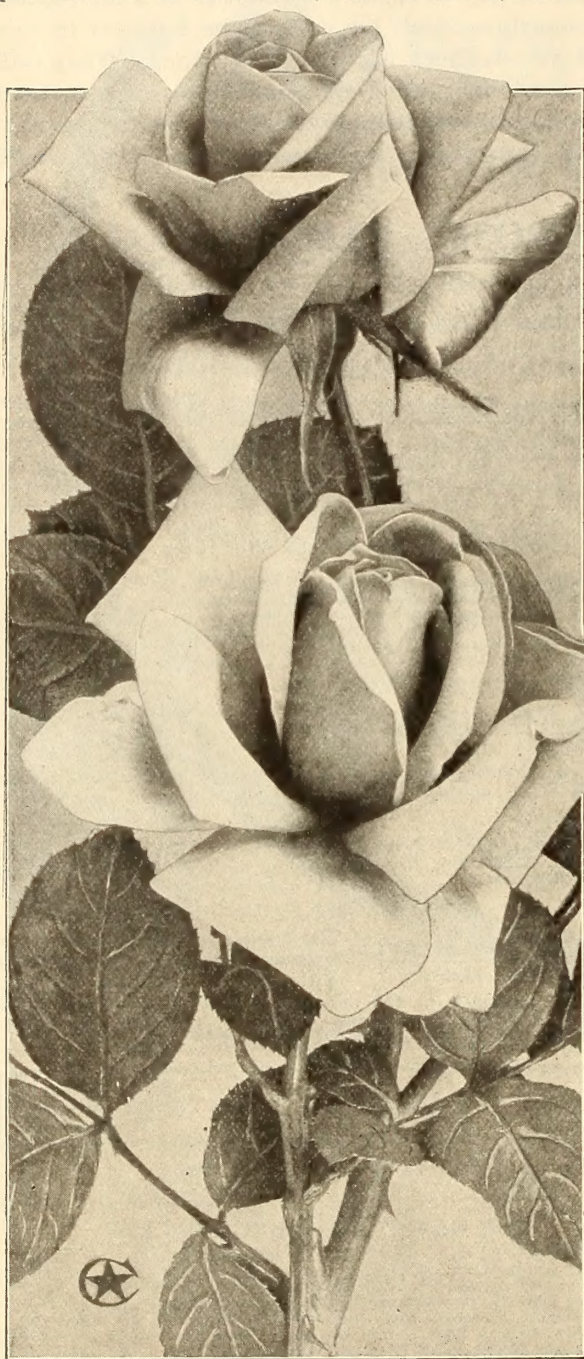

by reason of its dainty foliage. The young shoots are rich crimson in color, lending an added beauty that is not seen in many varieties. Hugonis is hardy as an oak and suitable only for lawn specimens or planting among shrubbery, as it is an exceptionally vigorous grower. Own-root pot-plants only, 1-yr. size, \$2 each, postpaid. Ready May 1.

MRS. BRYCE ALLAN. H.T. The globular, imbricated blooms are borne on erect flower-stalks and the entire bush is festooned with broad, deep, beech-green foliage. The color is solid carmine-rose and the strong moss-rose perfume is retained as long as the bloom lasts. 3 00

NATIONAL EMBLEM. H.T. The color is a beautiful dark crimson, overlaid velvety crimson and shading to vermilion toward the edges. The buds are very long and pointed and of ivory-like substance. The flowers are quite full, every one coming perfect, and are produced with marvelous freedom. 2 50

PRIMEROSE. H.T. A grand bedding Rose coming melon-yellow during the spring and summer but deeper in the autumn, with apricot shadings, most distinct in coloring. Flowers are delightfully scented and freely produced. 1 00

QUEEN OF FRAGRANCE. H.T. Color is shell-pink, tipped with silver, bright and charming. An outstanding quality of this new Rose is its powerful and delicious fragrance which won for it the Clay Challenge Cup (value, \$375) at the show of the Royal Horticultural Society, in July, 1914, as the new Rose possessing in the highest degree the true old-rose scent. 2 00

FOUR EXTRA-CHOICE ROSES

ALL DOUBLE—FRAGRANT—HARDY AND EVERBLOOMING

★ JONKHEER J. L. MOCK

Winner of Gold Medals, Special Awards and Golden Opinions

Like the rest of the Rose-growing world we are enthusiastic in praise of this famous Rose, which gained the distinction of being winner of the Grand Prize—Highest Award—at the International Rose Show held at Paris in 1911. The color is carmine on the outside, which contrasts beautifully with the lovely imperial pink of the inside of the flower as the petals unfold and curl, and the exquisite blooms are produced freely on stiff, erect stems. The flowers are very large, perfectly formed and highly perfumed. You should plant an entire Rose-bed of this one kind. 1-yr. size 25 cts., 12 for \$2.50, postpaid; 2-yr. 50 cts., 12 for \$5; Star size 75 cts., 12 for \$7.50, by express.

★ MISS ALICE DE ROTHSCHILD (Citron-Yellow)

BUSH MARECHAL NIEL

Beautiful flowers, large, full and of perfect form, with the petals charmingly reflexed. Color is rich, deep citron-yellow which intensifies as the bloom expands. A superb Rose in every respect. The flowers come freely, and have the deliciously fragrant Marechal Niel perfume. 1-yr. size 25c., postpaid; 2-yr. 50c.; Star size 75c., by express.

October 27, 1915.

Gentlemen:—I am glad to say that the stock I got from you this spring was highly satisfactory, especially so was the Rose, J. L. Mock. This is about the swellest thing I have ever seen, and your description of this Rose does not come anywhere near telling what a great Rose it is.—H. J. B., Indianapolis, Ind.

★ GENERAL-SUPERIOR A. JANSSEN

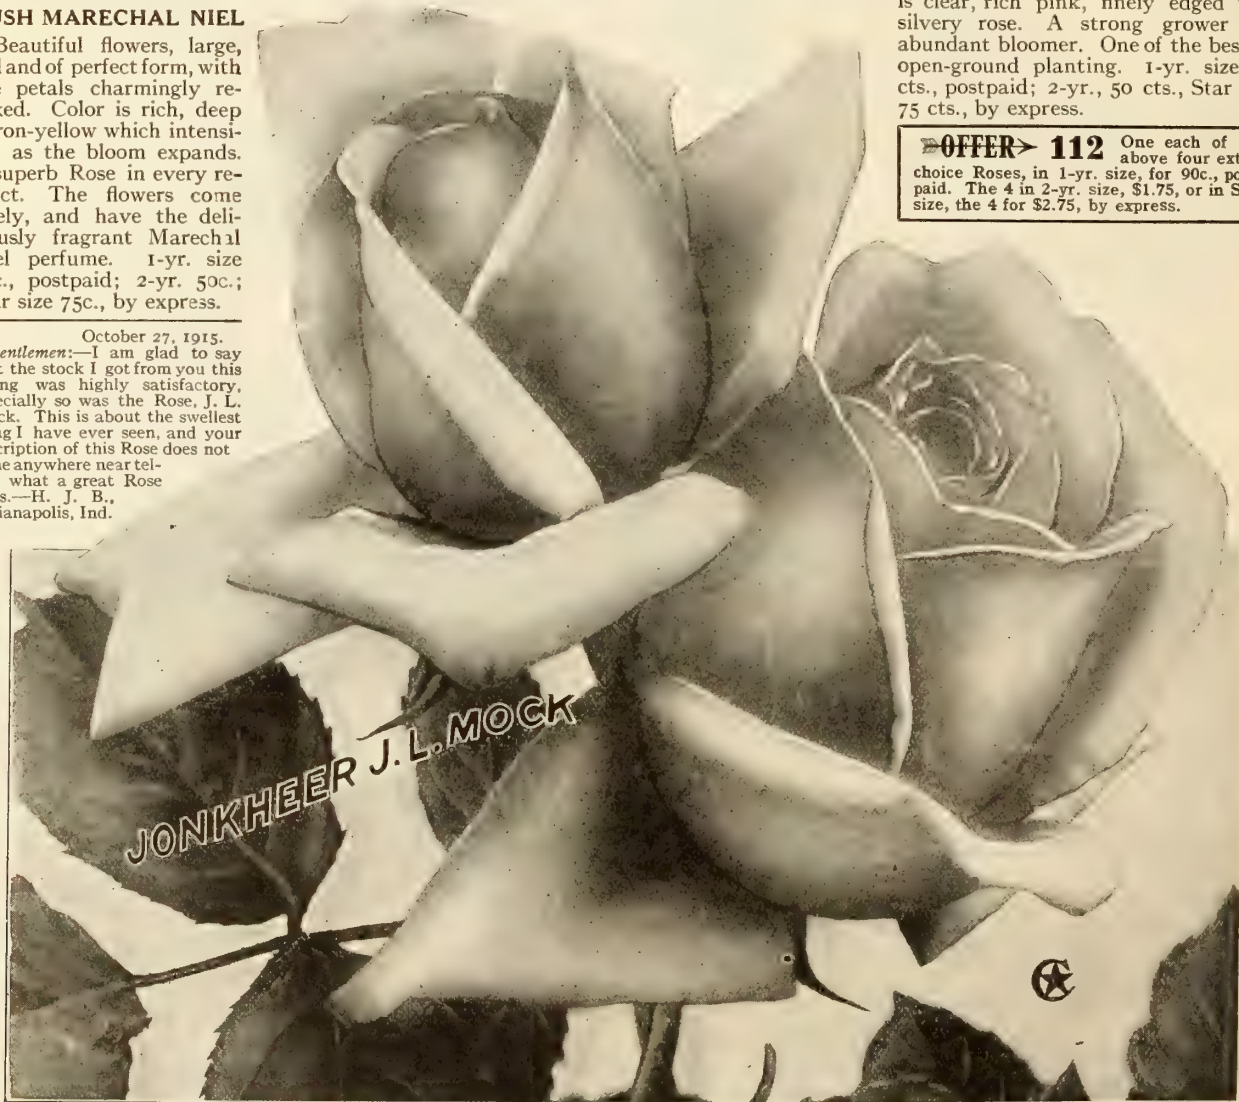

(Glowing Carmine)

The color of this splendid Rose is glowing rosy carmine and the flowers are well formed, with buds full and pointed. It is sweetly perfumed and blooms freely, making long, strong stems suitable for cutting for indoor decoration. A Rose we can heartily recommend. 1-yr. size, 30 cts., postpaid; 2-yr., 60 cts., Star size, 90 cts., by express.

★ MME. CAROLINE TESTOUT (Clear Pink)

In Portland, Oregon, and elsewhere, this variety is in great favor for mass planting along the streets. (See cut, foot of page 13.) It is a grand Rose, with large, full flowers and handsome buds, which resemble the famous La France Rose, but the color is clear, rich pink, finely edged with silvery rose. A strong grower and abundant bloomer. One of the best for open-ground planting. 1-yr. size, 25 cts., postpaid; 2-yr., 50 cts., Star size, 75 cts., by express.

OFFER 112 One each of the above four extra-choice Roses, in 1-yr. size, for 90c., postpaid. The 4 in 2-yr. size, \$1.75, or in Star size, the 4 for \$2.75, by express.

JONKHEER J. L. MOCK, 1-yr size \$17.50 per 100, prepaid; 2-yr. \$35 per 100; Star size \$50 per 100, by exp. 25 at 100 rate

CHOICE EVERBLOOMING HYBRID TEA ROSES

This we believe is the most popular class of Roses now in cultivation. These varieties are the result of a union between the Everblooming Teas and the hardy Hybrid Perpetual class, thus combining the exquisite richness of coloring and beauty of form in the one with the hardiness, vigorous growth and pungent fragrance of the other.

It is rather exceptional in the Roses of any other class to find so many excellent qualities; and when you add the splendid feature of blooming so freely and continuously throughout the season, it is easy to understand why these Hybrid Tea Roses are so popular.

EVERBLOOMING TEA ROSES

ALL ARE DELICIOUSLY FRAGRANT

The Roses in this class are highly valued because of their fine colors and exquisite tea fragrance. They will bloom freely from June until November. If thoroughly established during the summer, they will, with few exceptions, prove hardy here with protection. We wish to remind our friends of the superior quality of these plants; they are not the small slips so often sent out, which have been forced under a high temperature in little "thumb pots" into a quick, unhealthy growth; but these plants are the product of years of experience and our own improved method of culture, insuring the greatest possible vitality and abundance of bloom. See pages 20 and 21 for other colors.

This and the following two pages include our complete list of Tea Roses, arranged alphabetically in color groups. We believe that every Tea Rose most worth growing will be found in this list.

FOUR EXQUISITE EVERBLOOMING KILLARNEYS

March 8, 1915.
Conard & Jones Co.
Gentlemen: While
coming from New
York a few days ago, I
met a gentleman on
the train who said that
you were the only
people who could be
absolutely depended
upon to furnish the
kind of Roses I want.
—F. S. G., Wyoming,

KILLARNEY

Since the introduction of the original, beautiful imperial pink Killarney there have sprung from it many sports, and all are spoken of by their introducers as improvements on the original; but we find the majority of our customers demand "The Killarney" as first introduced. When we found other distinct colors, such as "White" and "Orange" Killarneys we, of course, proceeded to grow them, and these are offered below, and our hearty recommendation goes with every one of this illustrious set of Roses.

No hardy everblooming Roses will give more lasting satisfaction than can be had from these beauties, and for cut-flowers for indoor decoration they are unsurpassed.

Pink Killarney. Remarkable for its freedom of bloom and the large size of its intensely fragrant flowers. The buds are large, long and pointed. Color is exquisite, a brilliant imperial pink, sparkling and beautiful almost beyond description. This Rose is grown by the hundred thousand for cut-flowers, and still remains in the first rank, although introduced in 1898. A bed of these beauties in full bloom is a sight not easily forgotten. 1-yr., 25c., postpaid; 2-yr., 50 cts.; extra 2-yr., 75 cts., by express.

White Killarney. More double than Pink Killarney, and the flowers are pure waxy white, produced singly on strong, upright stems. 1-yr., 25 cts., postpaid; 2-yr., 50 cts.; extra 2-yr., 75 cts., by express.

★**Orange Killarney (Duchess of Wellington).** New. The flowers are an intense saffron-yellow or orange-color; very attractive and without a rival in this class and color. 1-yr., 30 cts., postpaid; 2-yr., 60 cts.; Star size, 90 cts., by express.

★**Killarney Brilliant.** New. Flower is larger, more double and a more brilliant pink than the parent Killarney. It is also fragrant and blooms freely. A desirable addition to this famous family. 1-yr., 30 cts., postpaid; 2-yr., 60 cts.; Star size, 90 cts., by express.

★**OFFER** 122 One each of the above 4, in 1-yr. size, 90 cts., postpaid; 2-yr. size, the 4 for \$1.80. The Pink and White in Extra 2-yr. and last 2 in Star size, the 4 for \$2.75, by express.

CONSTANT-BLOOMING BOURBON, BENGAL, AND CHINA ROSES

This is a class of Roses that no real Rose-lover can afford to miss; some of them are particularly famous for the large size, beauty and brilliant colors of blossoms. They bloom freely, flowering not only once, but all summer through. As a class they are moderately hardy, and if protected should live out over winter in this latitude. They like rich soil and when pruned they should be well thinned out and the shoots left for flowering only shortened slightly. Cut all the blossoms you wish; such treatment is good for the plants and encourages more bloom.

WILL BLOOM LUXURIANTLY IN OUR COLDEST CLIMATE

They will climb when trained, and the kinds marked ● creep along the ground as closely as an ivy, and make a dense mat of shiny, dark green foliage. The leaves are of leathery texture, practically insect-proof, and remain green on the plants nearly all winter. They bloom in profusion during June and July, and the single ones bear red berries in the autumn. Entirely hardy, and when once planted take care of themselves. They are excellent for training over graves (hence called Memorial Roses) or over rough ground, rocks, stumps or banks.

ALBERIC BARBIER. Leaves dark green, bronzy red in the spring and glossy; flowers in clusters, semi-double or double, creamy white with canary-yellow center. . . . extra 2-yr., 75c.

EVANGELINE. Single flowers 2 inches in diameter. Color white with tips of petals pink; deliciously fragrant. This is one of the most delicately colored Roses we know. . . . extra 2-yr., 75c.

FARQUHAR. Makes long, slender canes and is somewhat like Dorothy Perkins in bloom. . . . extra 2-yr., 75c.

★**HIAWATHA.** Brilliant scarlet; bears large clusters of single flowers; bright, effective, and useful for planting in masses.

LADY GAY. Flowers in large, loose clusters, of a delicate cherry-pink, fading to soft, tinted white. Unsurpassed for covering banks, arbors, fences, etc. . . . extra 2-yr., 75c.

PROF. C. S. SARGENT. ● A beautiful Rose of delicate buff with center of deep golden yellow; flowers are very double and 2½ inches in diameter; delightfully fragrant. . . . extra 2-yr., 75c.

IRONCLAD RUGOSA ROSES

Rugosa Roses and their hybrids seem just suited for our North American climates, as they are so tough and *hardy*. They make dense, sturdy, compact bushes, 6 to 9 feet high, according to variety, and are very ornamental. Their dark rich, leathery foliage is oddly wrinkled, shiny and remarkably free from insect pests. Some bloom all summer, others but once, but are followed in the autumn with a profusion of beautiful orange-red or crimson fruits. See the illustration in color in our \$1 Rose Book. The plants are hardy as oaks, and do well in the most trying places—seashore, mountains, or anywhere. On account of the shapeliness of their growth, these Roses are especially valuable for use as lawn specimens. Being well branched and very symmetrical, they make splendid hedges, having in their favor hardiness and freedom from insects and disease. The thorny nature of the plants helps to make a hedge almost impenetrable. We offer only the choicest varieties.

ALICE ALDRICH. We consider this a remarkably fine bush Rose for garden planting. It has lovely buds and its large, double flowers of clear, bright pink are borne at intervals during the whole growing season; very sweet and beautiful. It possesses all the excellent qualities of the Rugosa class. Price, 1-yr., 25 cts., postpaid; 2-yr., 50 cts.; extra 2-yr., 75 cts., by exp.

★**CONRAD F. MEYER.** (The New Tea Rugosa.) Splendid, large, elegantly formed buds and flowers, 3½ to 4 inches across and perfectly double. Color is clear silvery rose; very attractive; intensely fragrant; hardy and a very vigorous grower. Price, 1-yr., 25c., ppd.; 2-yr., 60c.; Star size, \$1, by exp. (See cut.)

We have cut several hundred perfectly formed buds and full-grown flowers of immense size from the bush and about 100 blooms remain. . . .—Yours truly, M. B. M.

THE SCOTCH ROSES (*Rosa spinosissima*). These Roses form small, compact bushes which need no pruning and are particularly useful where a low-growing thorny hedge is wanted. They are absolutely hardy and need no protection. The flowers have the simple charm of the single Rose, and quantities of them on the bush before opening look like little balls. We offer two colors:

Spinosissima rosea. Soft pink. **Spinosissima rubra.** Dark red. Both varieties, 1-yr. size, 30 cts. each, postpaid; 2-yr. size, 60 cts. each, by express.

MACARTNEY. A southern favorite. The plants are evergreen, with dark, shining foliage, and do best when trained against a south or east wall. Beautiful large single white flowers, with glistening golden stamens. Very fragrant. 1-yr., 30 cts., postpaid; 2-yr., 60 cts., by express.

HARDY HYBRID PERPETUAL ROSES

The Hybrid Perpetuals are considered the most valuable of all Roses, because they bear the largest, sweetest and most brilliantly colored flowers, and are so hardy and vigorous they live over winter with slight protection, and continue to bloom regularly from year to year. Their grand flowers are of all shades of red, crimson, scarlet, pink and white, but no yellows. They thrive and bloom finely in all sections of the country, and should generally be planted in the open ground, as but few varieties are suitable for house culture. Some kinds do not bloom till the second year, but when fully established bloom regularly at the usual time and occasionally during the summer and fall months. Though called "Perpetual," they are not constant bloomers, except a few as offered on page 36, but are the finest and most beautiful of all hardy Roses.

American Beauty. Color a deep pink to crimson; flowers intensely fragrant. We do not recommend this Rose for garden planting except in some sections of the country, where it thrives abundantly in the open ground. In the cut-flower realm it reigns supreme, but requires expert knowledge to grow it. There is a large demand for American Beauty, and we supply fine, strong plants in 1-yr. size, at 25 cts. each, postpaid; 2-yr. size, 50 cts. each, by express.

Alfred Colomb. A noble Rose; large, globular flowers; bright, rich crimson, dark and handsome. The bush is a strong, erect grower, entirely hardy, and an abundant bloomer. 1-yr., 20c., postpaid; 2-yr., 50c., by exp.

★**Anna de Diesbach** (**Glory of Paris**). One of the old varieties, introduced in 1858. Color is a beautiful shade of carmine-pink; flowers are extra large, full and very sweet. A Rose that everyone should have. 1-yr., 20c., postpaid; 2-yr., 50c.; Star size, 75c., by express.

Ball of Snow. Pure snow-white, sometimes faintly tinged with pale rose; flowers medium size, full and fragrant. 1-yr., 20 cts., postpaid; 2-yr., 50 cts.; extra 2-yr., 75 cts., by express.

TWO SPLENDID SETS FOR THE NORTH

We realize that great numbers of people who live in the northern states think that they cannot grow Roses on account of the severe winters; but Roses can be grown in any climate, provided the right kinds are planted, and we have listed below twenty sturdy, vigorous kinds, most of them deliciously fragrant and all of them free bloomers when they become established. Try both sets.

THESE NEED NO PROTECTION

The Roses in this set will grow and bloom profusely in the coldest climate and need no winter protection, though some protection will help the plants to bloom better the next summer. These are not bedding Roses, and if planted together, should be at least from 2½ to 4 feet apart.

- ★**BLANCHE MOREAU.** An exquisite, white Moss Rose.
- ★**CLIO.** Flesh-color with rosy pink center. See cut, page 36.
- ★**CONRAD F. MEYER.** The new Tea Rugosa. Flowers large and full, clear silvery rose-color; fragrant. See cut, page 31.

PROTECT THESE FOR WINTER

The hardiest of the everblooming Roses are listed here, and all should live through the most severe winters if protected as follows: Before frost, hill the earth around the plants to about 8 or 9 inches on the stems. When frozen, cover with strawy manure or leaves, about 6 inches thick, and on top of all place a little roof by nailing boards together in this way A. This sheds the rains and prevents moisture collecting around the plants.

- BABY RAMBLER.** Bright crimson; flowers are borne in clusters; blooms unceasingly.
- BLUMENSCHMIDT.** Citron-yellow; fragrant. See cut, page 20.
- CECILE BRUNNER.** Dainty rose-pink flowers; greatly in demand for bouquets; fragrant. See cut, page 23.
- GRUSS AN AACHEN.** Flesh-pink, shading to salmon-pink in the center of the flower. A superb Rose.

20,000 of these C. & J. Cannas now beautify the public grounds of the world's most beautiful National Capital

An Interview at Washington, D. C.

"The fact of the matter is that in the next 15 years Cannas are going to have the right of way. There is nothing to equal them."

It was Mr. Henlock speaking, expressing, not a burst of enthusiasm, but deliberate conviction born of long experience. Mr. Henlock is a gardener of the first order. Technically, he is in the War Department, U. S. A.; practically, he is responsible for the best possible show of bloom and color display throughout the grounds that surround the Capitol, White House, and the other public buildings of our National Capital.

"Is there any wonder," he said, "that tourists from Denver, Chicago, St. Louis and New York ask: 'What is it?' 'Where can I get it?' We tell them!"

"It seems to me," he continued, "that the Park Superintendents of this country should take the lead in planting these notable flowers and not let the private planters get ahead of them."

"And," he added, "I want to say this, practically all the Cannas that we have here in Washington (over 20,000) came from The Conard & Jones Company at West Grove!"

Extract from "The North American"

Philadelphia, October 18, 1915

"For twenty-one years a Chester County man, Antoine Wintzer, has been toiling day in and day out to get what florists consider an acme of their art, a White Canna. In these twenty-one years he has produced more than 60,000 varieties of Cannas . . . and out of these only 5,000 have been considered distinctive enough to cultivate as new varieties. . . .

"A majority of the improved American Cannas in the last twenty years have originated with Mr. Wintzer. His is the Mrs. Alfred F. Conard, the brilliant salmon-pink Canna; Wintzer's Meteor has won many commendations; another pink is Mrs. Woodrow Wilson; in fact, Mr. Wintzer has originated more pink Cannas than all the other American growers put together. . . .

"He has waved his hand over a mass of pink, and transformed it into a field of red. He has touched a leaf of deep green and it has turned bronze. He has passed a magic wand over a field of insignificant blossoms and trebled their size. . . .

"Yet he says he is no wizard."

C. & J. NEW CANNAS FOR 1917

❖ **Snow-Queen.** 4 feet. Another step in the march toward a perfect white bedding plant. Here is a Canna of crystal brightness. When grown in a row, the mass-effect of snowy whiteness tempted us to call it **Snow-Queen**. There was another reason. Just as you have noticed the opalescent, rosy hues among the crystals in the snow, so here a close examination reveals faint flashes of fairy pink spots, though the effect is white. The flowers are large, 6 inches across, with rounded petals $2\frac{1}{2}$ inches broad and of firm texture. They are borne well above the luxuriant green foliage on erect, branching heads in large clusters. Strong plants, \$5 ea., del'v'd.

❖ **Druid Hill.** 4 feet. In striking contrast to **Snow-Queen** is this dark-stemmed, deep red-flowered beauty. It has most distinct characteristics. The plant has ebony-red stems and is well furnished with Black-Beauty foliage of more than usual grace. Such a setting makes doubly effective the well-poised heads of rich crimson bloom. Average-sized flowers, but a color combination as yet unmatched. Plants, \$2.50 each, delivered.

❖ **Morning Glow.** 4 feet. Another color contrast of more than usual picturesqueness; foliage an olive-green striped and veined with bronze. A greatly improved descendant of Evolution, with well-mounted flowers of exquisite, soft shell-pink and orange-red center. Plants, \$2.50 ea., del'v'd.

❖ **Aurora.** 5 feet. Perhaps the fanciest of all our 1917 introductions. An imposing variety with green foliage and plants 5 feet high, of good habit, large clusters, flowers of brilliant scarlet, petals broadly edged with pure yellow. Plants, \$2.50 each, delivered.

❖ **OFFER** ➤ 38 Above 4 New Cannas, \$10 delivered.

Extract from "Every Evening"

Wilmington, Delaware, May 29, 1915

"Take a few hours off any afternoon, trolley or motor to West Grove, just beyond the Delaware-Pennsylvania line, and see with your own eyes what man's genius may accomplish when in copartnership with Madame Nature. . . . A firm at West Grove, The Conard & Jones Co., has exhibits at the Panama-Pacific Exposition at Frisco. There are 10,000 Cannas from West Grove out there for the eyes of millions to contemplate. West Grove may be small, but the Rose Center has decidedly put it on the map in colors!"

Presidents may change but C. & J. Cannas continue to be used on the front lawn of the Nation

HOW TO ARRANGE CANNAS IN A CIRCULAR BED

Get the tallest-growing varieties in the center, and then carefully grade each succeeding circle, using dwarf kinds for the outside. Plant one Canna in center of bed, next six Cannas 18 inches apart in a circular row 18 inches from center. For each succeeding circle use six more Cannas than were used in the previous circle and make 18 inches farther away from the center. A 10-foot bed thus planted will contain 1 Canna in center, 6 in first circle, 12 in second circle and 18 in outer circle, all 18 inches apart.

HOW TO PLANT and GROW C. & J. IMPROVED CANNAS

Dormant Canna roots may be started indoors during March or April, but should not be set out until weather is settled and the ground warm—usually May or June in this latitude. When planting dormant roots do not set too deep. The eye should show a little through the ground when done. Plant in good, rich garden soil mixed with one-half of old, rotted stable manure. Set them about 18 inches apart each way. Water sparingly the first two weeks after planting; when growing freely, water liberally.

From the Superintendent of Parks, Minneapolis, Minn.

THE CONARD & JONES CO. November 5.
Gentlemen: I wish to say that I was indeed very much pleased with your Canna exhibit in the Outdoor Garden of the S. A. F. and O. H., which was of unsurpassed beauty during the entire summer. All your Cannas were free bloomers, showing erect flower-spikes, which were well branched, of excellent colors and perfect flowers. The varieties I admired most were Meteor, Mrs. A. F. Conard and Panama. Yours very truly,

THEODORE WIRTH,
President Society of American Florists

HARDY PERENNIAL PLANTS

Or Old-Fashioned Garden Flowers

Valuable for adding brightness and color to the border beds, and a comparatively small collection will enable you to have some flowers in bloom all summer through. Useful as cut-flowers.

The first figure after a variety indicates height of growth. The next figures indicate the months the flowers bloom in this locality. Some variation must be allowed according to latitude.

DIRECTIONS.—We send you most of these in strong roots. Allow from 1½ to 4 square feet of space for each. After the first severe frost in the fall, cut down the tops to within 3 inches of the ground, and give the bed a good coat of half-rotted manure, which will protect the plants and enrich the ground; dig this under in the spring before new growth starts.

Price: Unless otherwise noted, 20 cts. each, 12 for \$2, postpaid; 25 for \$3, or \$10 per 100, by express

Note.—Remember that our postpaid prices include delivery charges for which many other firms charge extra.

FINEST DOUBLE HERBACEOUS PEONIES, PRIMULA, ETC.

Peonies, "Aristocrats of the Flowers"

STANDARDIZED ACCORDING TO THE AUTHORITY OF THE AMERICAN PEONY SOCIETY

As Cut-Flowers
Peonies
are Unsurpassed

Peonies today show a wonderful improvement over former years. There is something of true magnificence about this aristocrat of the flowers, and in large mass planting they produce an effect that you remember—great, gorgeous blossoms, daintily dyed with the most exquisite shades, from white to the deepest reds. They are deliciously fragrant, and for effective decorations, especially on a large scale, are unsurpassed. Bloom several weeks in the spring. Height, 2 to 3 feet.

CULTURE.—They will grow anywhere, reasonably speaking, though they do best in rich, deep soil and a sunny position, but thrive in partial shade. Plenty of water during the growing season is an added stimulus. They require no protection and are not troubled with insects or disease.

SEVEN GRANDEST PEONIES

COURONNE D'OR. White with a blotch of red in the center around which is a halo of yellow. Immense, ball-shaped bloom. 75 cts. ea., ppd.

FELIX CROUSSE. A leading red Peony. An exceptionally striking kind, with large, double, ball-shaped blooms. Extra fine in every way. 85 cts. each, ppd.

HARDY PERENNIAL PHLOX, ORIENTAL POPPIES, HARDY PINKS, ETC.

THE CHOICEST HARDY PHLOX

The improved varieties of Hardy Perennial Phlox, which we offer, are among the handsomest and most useful of hardy herbaceous plants. The flowers are large, and borne in massive heads of most brilliant colors. The plants are perfectly hardy, and when established will bloom on year after year, with little or no attention. There are few plants that with so little care will make such a handsome display of brilliantly colored flowers every season. To obtain best results, the soil for them should be deeply dug and have incorporated into it some well-decayed manure. They will be better if given water during a dry spell and a mulch of manure for the winter.

USEFUL ORNAMENTAL HEDGES

Beautiful hedges add much to the appearance of a property, and are everywhere coming into more general use. They look better than fences, last longer and cost less. When once established, they require only a little cultivation and pruning each year to keep them the desired shape and size. A fence is more trouble; a hedge grows better-looking every year. These plants are also used for individual lawn specimens. See between the trees in the illustration.

We can furnish a fence to grow like this California Privet Hedge at 5c. a "running foot." It can be trimmed at any time without injury

BEAUTIFUL HARDY CLIMBING VINES

CLEMATIS PANICULATA

Flower-lovers and gardeners know how indispensable are Vines and Climbers for beautifying one's place, especially near the house. Plant Clematis, Climbing Roses and Honeysuckles about the front porches, with perhaps a vine or two of the Chinese Wistaria to climb as high as the roof. Stone or brick walls are always prettier when ivy-clad. Then, going around to the rear of the house, if you have a trellis to cover, or want a screen for certain buildings, get Honeysuckles, and if you need something to cover a large space quickly, try the Kudzu Vine; the Trumpet Creeper also is good. On the next three pages are the best Climbers for arbors, arches, trellises, porches, etc. Remember how pretty an arbor can be. American Ivy or even Grape-vines (page 53) make a good covering, too.

SWEET - SCENTED JAPAN CLEMATIS OR VIRGIN'S BOWER

Clematis paniculata

(As shown in illustration.)

Flowers small, rich creamy white, borne in handsome clusters, completely covering the vine, and the flowers are followed by silvery, feathery seed-pods which keep the vine attractive until mid-winter; exceedingly fragrant. The sweetest of all Clematis, and one of the hardiest and easiest to grow. Good, strong plants, 15 cts. each, \$1.50 per doz.; 2-yr. plants, 30 cts. each, 3 for 75 cts., \$3 per doz.; extra-size, three-year plants, 40 cts. each, 3 for \$1.10, \$4 per doz., all postpaid.

HARDY ENGLISH or LARGE-FLOWERED CLEMATIS

The flowers are large, often measuring 4 to 6 inches across, and are borne in great profusion during July and August. If the location is somewhat moist, partially shaded and on the north side of the house, so much the better. They are entirely hardy.

Cultural Directions

Clematis should have rich, deep soil, and it is most important that the newly set plants have firm supports on which to climb. They should be tied to these supports as soon as they have made even a few inches of growth. If allowed to be blown back and forth by the wind, the outer bark gets split, as a result of which the plant is likely to die.

The reason many Clematises fail is on account of being planted close to a house where the soil is usually poor and full of brickbats and mortar; instead of which each plant should have, at least, a full barrow-load of the finest, choicest soil.

With good soil and proper care these plants can be easily grown.

NOTE.—Please read and follow carefully the cultural directions for Clematis, as we cannot and do not guarantee the English Clematis to grow.

JACKMANII. Bears great wreaths and clusters of splendid purple flowers, 5 to 6 inches in diameter. This variety should be trimmed back in November, as its blossoms come on the new shoots.

RAMONA. A very free bloomer; flowers deep sky-blue and very handsome.

VILLE DE LYON. Flowers large, of a beautiful wine-red.

HENRYI. Rich creamy white; enormous bloomer. (See illustration.)

GIPSY QUEEN. New. Dark purple, reddish stripes. Unlike any other.

LUCIE LEMOINE. A splendid double; pure white. Highly recommended.

Price, same for all: Strong, one-year plants, 30c. each, 3 for 75c.; two-year plants, 40c. each, 3 for \$1; three-year plants, 50c. each, 3 for \$1.25; all postpaid.

SWEET-SCENTED HONEYSUCKLES

We recommend these beautiful Honeysuckles, as they are strong, vigorous growers, not troubled with insects or disease, and, having plenty of foliage, are very desirable for shade and shelter. Several varieties are almost evergreen and retain their foliage nearly all winter; most of them are deliciously fragrant.

Everblooming Honeysuckle, Heckrottii. Color is crimson-carmine on the outside of the flower, which contrasts beautifully with the golden apricot of the inside as the flower opens. Blooms unceasingly all season. (See illustration.)

The Beautiful Halliana Honeysuckle. This variety is *intensely* sweet-scented. It is a strong, clean, neat grower, perfectly hardy, almost evergreen, with leaves that shine as if varnished; constant and most profuse bloomer; flowers buff-yellow, passing to white.

Evergreen Sweet-scented Honeysuckle. A hardy, vigorous grower; deliciously sweet; flowers buff, yellow and white.

Golden-leaved Honeysuckle. Slender, moderate grower; leaves beautifully veined and netted with clear yellow, so that the prevailing color of the foliage is bright yellow; flowers yellow and sweet-scented; fine for pillars and trellises.

Hendersoni. Brilliant orange-red with bright yellow at the mouth of the flowers that are produced throughout the growing season. The clusters are large and long, and borne on long stalks, making them useful for cut-flowers.

Red Coral Honeysuckle. A hardy, rapid grower, suitable for rockwork, walls, etc. Flowers coral-red, very pretty.

204 C. & J. FINEST MIXED ASTERS ⊙

This is a fine mixture of the best and most beautiful Asters for general planting. It is made by ourselves and includes a great variety of the best kinds and choicest colors. They are no trouble to grow and can be planted in masses by sowing broadcast, but it is best to start the seeds early, in a hotbed or in the house, and transplant outside about May 10 in this latitude. This splendid mixture has received high praise from our customers and, knowing the varieties included, we recommend it strongly. Pkt. 10 cts., ¼oz. 40 cts., oz. \$1.50.

The Asters I got of you were superb. I had a big bed of them, crimson in the center, then white, then shell-pink and the outside row purple. It was a show bed—they looked more like chrysanthemums than Asters—Mrs. W. T. Z., Malvern, Pa.

Original Native Canna

C. & J. New Seedling Lily-Canna

Mr. Wintzer among his "pets"—Mrs. A. F. Conard Cannas

C. & J. CANNA SEEDS

We lead in Canna Seeds as in the plants, for these seeds are produced on our own grounds and cannot be surpassed. (See our Canna plants, with fuller descriptions, offered on pages 38 to 41.)

When ready to plant, soak seeds in warm water for half a day or more, and then plant indoors, about 1 inch deep in a moist, sandy soil. You should get about sixty per cent to germinate. Transplant to 18 inches apart as soon as the ground is warm—not before.

C. & J. seeds are saved from picked flowers only and cannot be duplicated anywhere

These named kinds have been picked from named Cannas, but, as they are not segregated, the seeds cannot all be expected to come true to name; but they will in every case produce beautiful blooms.

BEST UP-TO-DATE SWEET PEAS

NO FLOWERS ARE EASIER TO GROW OR MORE CERTAIN TO GIVE SATISFACTION

The culture is very simple—plant the seeds 3 or 4 inches deep, in the most convenient place you happen to have, very early in the spring—just as early as possible—February, March, April or May, according to the season and locality. Keep the ground loose and mellow, give the young plants good support to climb on—wire netting, twine or brush. Keep the flowers picked off clean every day as fast as they open (**this is very important**), and they will bloom abundantly for weeks.

NOTE.—Our regular 5-ct. pkts. of Sweet Peas each contain from 80 to 90 seeds, enough for a single row 4 to 6 feet long; 1 oz. contains from 300 to 360 seeds, sufficient for a single row 20 feet long, and 1 lb. is enough for 75 feet of row.

Price: Pkt. 5 cts., any 6 pkts. for 25 cts., 10 pkts. for 40 cts., oz. 20 cts.; in larger quantities, 1/4 lb. 50 cts., lb. \$1.50, postpaid

NEW SELF-WATERING FLOWER-BOXES

This shows how flowers will do "down town" where they do not get much sun. Here we have Geraniums growing and blooming beautifully, with *Vinca variegata* to droop over the edge. (See offer No. 86 below.)

ALWAYS NEAT AND SATISFACTORY—EVERY ONE GUARANTEED NOT TO LEAK

Your interest and ours will be mutually served if you order one or more of our Self-watering Boxes. Their chief merit lies in the fact that plants grow and thrive better in them, and blooms will be larger and foliage heavier, than in the ordinary surface-watered boxes.

The boxes are provided with a self-watering device which renders attention unnecessary except at intervals of from 10 to 20 days. They are made of strong

galvanized iron and painted an attractive green. Through the tube in the corner water is poured into the reservoir (e) underneath the false bottom (d) which supports the soil (b).

Sponges (cc) touch the extreme bottom of box and extend upward into the soil in which the flowers are planted, thus

SUPPLYING WATER BY SUB-IRRIGATION

From Hotel Windermere—Chicago

I am pleased to say that we have had your Self-watering Flower Boxes in use for about a year. By their use we have been able to grow our plants in corners and places where the sun does not shine. We can heartily recommend them.—Charles G. Moore, Mgr.

From a Florist

Gentlemen:—Words cannot express my satisfaction in these boxes and baskets. Plants grow better in them, but the non-dripping and non-rotting mean more than anything else to me. Very truly yours, A. S. F., Florist, Deansboro, N. Y.

★ ROSE, "EXCELSA"

Or RED DOROTHY PERKINS

This now famous climbing Rose, hardy as an oak, free-flowering and delightful in color, has the foremost place among Rose-lovers who formerly planted the old Crimson Rambler when a hardy red climber was needed. Excelsa has a color all its own, being an intense, clear, crimson-maroon in some lights and at other times the blooms are deep cerise-pink which we have tried to show in our color illustration. The flowers are large for this class and produced twenty to thirty on a stem, while almost every eye on a shoot makes a cluster of bright blossoms which almost hide the foliage, so great is their profusion. Excelsa won the Hubbard Memorial Medal for "the best Rose introduced in the past five years" and no other red hardy climber has surpassed it since its introduction.

Price, 1-yr., 25 cts., postpaid; 2-yr., 50 cts.; Star size, 75 cts.; extra-large size, \$1, by express.

Germination Table, with Index to Flower Seeds

It is important to know the approximate time required by seeds for germination in order to sow them with satisfaction and success. Many seeds are condemned and neglected before they have had sufficient time to start. Always divide the packages and sow at different times. You can then give them a second or third trial. Sow seeds that start about the same time together. Keep the seed-box or bed moist, but not wet, and do not let the soil dry out until the seeds have had ample time to germinate. (See Self-watering Boxes, page 86.) Seeds are influenced by conditions, and the plants may appear 25 per cent earlier or 25 per cent later than the table indicates, according to circumstances. Following is the page reference and the key to germination: **a**, 5 days, **b**, 8 days, etc. The star ***** added means that the seeds may take much longer time than stated, some lying dormant for weeks or months before starting.

For the convenience of our customers, we have employed these signs to indicate the class to which belong the varieties opposite which they each appear on seed pages.

☉ **Annuals.** These grow, flower and die the first year from seed.

☺ **Biennials.** These grow from seed one year, bloom and die the next; if sown early, some varieties bloom the first year.

➤ **Greenhouse Plants.** Start seeds inside, transplant outside when all danger of frost is over.

2 **Perennials.** Continue for several years, and bloom annually after the first season; some varieties, if sown early, bloom the first year.

 **Stove Plants.** Grow inside all year. For pots only.

§ **Climbing Plants.** Climbers.

Flowers from Seeds. Any ordinary soil will grow beautiful flowers if you make it fine and mellow, and plant about the time the fruit trees are coming into bloom. Very fine seeds should be merely pressed in with the hand, therefore do not cover too deeply and do not plant when ground is wet and soggy.

Do not allow plants to stand too thickly; transplant if necessary. If crowded, they cannot grow or bloom satisfactorily.

Transplanting. Nearly all flowers are improved by transplanting except sweet peas, poppies, nasturtiums, etc., which are usually sown where they are to grow. By starting tender seeds in window-boxes, hotbeds or coldframes, and transplanting at proper time when ready, you escape danger from frost.

15 HARDY EVERBLOOMING ROSES \$1.00

POSTPAID

EACH ONE CAREFULLY LABELED. NO TWO ALIKE.

ALL GUARANTEED TO BLOOM

CONSIDER what this offer means to you! Roses, sturdy, healthy, vigorous bushes, with a root system so well nourished and developed that success from these plants is assured—for less than 7 cts. each, delivered! It's a wonderful offer, as it brings Roses within the reach of everyone who cares to have them and in these 15 thrifty young plants you will have the nucleus of a Rose garden such as you will be proud of for years to come.

In this set of 15 Roses of our selection, we send 12 everblooming bush Roses, sufficient for a bed 3 feet wide by 8 feet long, and 3 hardy climbing Roses (including one glorious American Pillar) for the back and two sides of an arbor or for climbing over a trellis, arch or porch. A nice idea would be to make an arbor and have it facing towards the Rose bed.

The bush or bedding Roses should bloom in from 6 weeks to 2 months after planting, but the climbers cannot be expected to bloom until next season, however, they will make canes this year from 8 to 10 feet long on which an abundance of bloom will be produced next year and succeeding years and the sooner your climbers are started, the sooner you will have them bloom. Every Rose we send is guaranteed to bloom at its natural blooming time (the bush Roses this year and the hardy climbers next year) or we refund the cost of those that do not bloom. Can anything be fairer than this—No bloom, no pay! We assume any risk of these Roses not blooming and with this assurance you can order liberally for yourself and your friends.

GENTLEMEN:

I got the 15 for One Dollar Roses you sent me on March 15th. We had one bed prepared, so when they came we planted them and put glass jars over them. We had roses all summer and in November I counted 126 buds on the plants and I cut a large bouquet to take with me on a trip.

L. S. K., Oklahoma City, Okla.

GENTLEMEN:

I ordered some Roses from you last Spring, 15 one year plants for \$1.00, I think it was, and they are beauties. Last Summer they had some beautiful Roses, and now I am looking forward to their blooming this season.

MRS. W. P. C. Jr.,

West Bangor, Penna.

Please remember it is not the guarantee which makes the Roses bloom—but it is the quality of the plants that enables us to make the guarantee.

Please send me your Pleasant Surprise Offer by express. I received this collection last fall and can say that I never realized so much pleasure for one dollar before.

Weeping Lantana "Mrs. McKinley"

A Bed of McKinley Lantana is very attractive

Our illustration gives some idea of the charming Weeping Lantana when planted in baskets, vases or pots, for which it is particularly recommended; but it is, if possible, more beautiful still when bedded out, as the plant is a neat, handsome grower, producing a great abundance of leafy vines, which cover the ground with their pretty foliage, and bear such an immense profusion of lovely lilac-pink flowers, that the whole bed seems a sheet of bloom from early Summer till late Fall. Scarcely anything on our grounds attracts more attention than a bed of this charming Lantana. The flowers are borne in clusters, and hundreds of them are in bloom all the time. We make prices very low so as to meet the large popular demand for bedding, window boxes, vases, etc. Price 15c. each; 2 for 25c.; 5 for 50c.; 12 for \$1.00 postpaid.

SELF-WATERING HANGING BASKETS

Never Leak a Drop.
